

MOHAMMED ARSHAD

(380) 240-1086 | m.lnu100@vikes.csuohio.edu | linkedin.com/in/mohammedarshad31 | github.com/Yaya3124

SUMMARY

Software engineering student with full-stack experience in Java, Python, and JavaScript. Proven ability to build backend systems, data pipelines, and scalable applications. Strong foundation in OOP, algorithms, and database design. Looking for SWE roles where I can ship clean, maintainable software.

EDUCATION

B.S. in Computer Science, Minor in Mathematics — **Cleveland State University** Aug 2022 – Dec 2026

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (ES6), SQL, Bash/Shell

Frameworks & Backend: Node.js / Express.js, React Native, Vaadin, REST APIs

Databases: MS SQL Server, Relational Database Design

Tools & Platforms: Git/GitHub, Docker, Linux, Azure DevOps, JUnit, VS Code, IntelliJ

Certifications: AWS Certified Cloud Practitioner

EXPERIENCE

Software / Data Engineering Research Assistant | *Cleveland State University – Office of Research*
May 2025 – Sep 2025

- Built automated ETL pipelines in Python to ingest, clean, and transform large-scale wearable sensor datasets across multiple research subjects.
- Developed custom data processing tools to support end-user research workflows, reducing manual overhead significantly.
- Collaborated with cross-functional researchers to translate requirements into software solutions; authored internal documentation for onboarding and maintenance.

Engineering Peer Teacher (Java & Algorithms) | *Cleveland State University* Aug 2023 – May 2026

- Led weekly programming labs covering OOP, data structures, algorithms, and debugging for 20+ students per session.
- Designed hands-on coding exercises; assisted students with debugging and software design best practices.
- Awarded Engineering Peer Teacher of the Month (Feb 2025) for technical clarity and student engagement.

Mathematics Tutor | *Cleveland State University* Aug 2024 – Dec 2024

- Tutored algebra, calculus, and discrete math; facilitated group sessions and tailored strategies to diverse learning styles.

PROJECTS

SchedEase — Web-Based Schedule Planner | *Java, Vaadin, SQL, Full Stack* Academic Project

- Built a full-stack scheduling platform with a Java backend, Vaadin stateful UI, and relational database schema with conflict-detection logic.
- Implemented modular OOP backend architecture; collaborated via GitHub with branch-based development and issue tracking.

Mobile UNO Game | *React Native, Node.js* In Progress

- Implemented core game engine with deck generation, rule enforcement, and turn state management using scalable backend architecture.
- Designed backend-friendly structure to support future multiplayer, server-side validation, and AI-based agents.
